

# Course Overview - HAV Management Essentials

## Why is our HAV Management Essentials course so important?

The current HSE approach to hand-arm vibration is about implementing a simple system that is reasonably practicable and designed to educate and protect the workforce. In keeping with the widely-respected HAVi approach of empowerment and improving understanding, this popular training course will help you implement a complete HAV management programme, simply and effectively, to keep your people safe.

## Who is the training for?

Directors, managers, supervisors, health and safety representatives and operators themselves will all benefit from this course. In short, anyone who wants to learn more about the management of the risks associated with HAV. Everyone from construction workers to medical professionals has benefited from this course.

## But isn't it very technical?

This isn't some dull, technically-intense course. At HAVi, we believe that people learn more when they are enjoying themselves. That's why you will find this course is fun, informative and practical. Fun? Yes, that's right! Although no corners are cut in helping delegates to understand the serious risks of HAV and how to manage them, the learning is provided in a fun way. You'll even get to play with plastic building bricks!

## So just what will I learn?

By the end of this training course, delegates will be able to:

- Reference the relevant health and safety regulations
- Understand the health effects of HAV
- Understand the business impact of HAV and the benefits of risk management
- Carry out effective risk management
- Plan jobs to minimise exposure
- Understand what health surveillance is required
- Implement effective health surveillance for all staff
- Deliver briefing sessions to ensure all workers understand how to protect themselves from HAVS
- There is no better way to learn how to keep yourself and your colleagues safe from the risks of HAV.

## Bespoke Training Solutions

As well as attending one of our regular training courses, if you have six or more people who need training, we'll come to you! For just £325 for each delegate, we'll deliver the HAV Management Essentials training course wherever you want, anywhere in the UK (Highlands and Islands at additional cost).

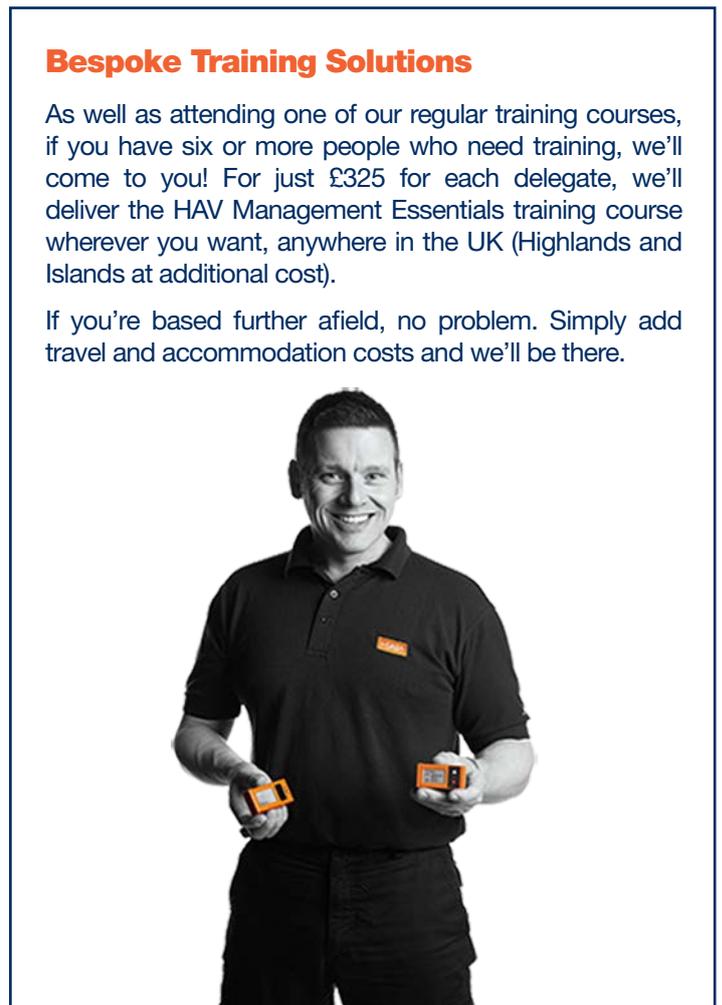

If you're based further afield, no problem. Simply add travel and accommodation costs and we'll be there.

## How much does it cost?

There can be no price put on the health of your employees, and we at HAVi are also aware that budgets can be constrained particularly in the current climate. This is why we at HAVi have made the course as reasonably practicable as possible. The cost of the HAV-ME course is £325.00/delegate and you also get a free HAVi Manager Entry Level Kit worth £164.00 for every delegate attending.

We now include IOSH certification for every delegate.
